

Project Design Phase-II Technology Stack (Architecture & Stack)

Date	18 November 2023
Team ID	PNT2023TMID592248
Project Name	Potato Disease Classification
Maximum Marks	4 Marks

Technical Architecture:

The Deliverable shall include the architectural diagram as below and the information as per the table1 & table 2

Guidelines:

1. Include all the processes (As an application logic / Technology Block)
2. Provide infrastructural demarcation (Local / Cloud)
3. Indicate external interfaces (third party API's etc.)
4. Indicate Data Storage components / services
5. Indicate interface to machine learning models (if applicable)

Table-1 : Components & Technologies:

S.No	Component	Description	Technology
1.	User Interface	How user interacts with application e.g., Web UI.	HTML, CSS, JavaScript / Angular Js / React Js/ Node Js etc.
2.	Application Logic-1	Logic for a process in the application	Java / Python
3.	Database	According to the problem statement collect the dataset.	File Manager, MySQL, NoSQL, etc.
4.	File Storage	Requirement for storing the dataset	Local System, Google Drive, Google Cloud Etc.
5.	Frame Work	Used to Create a web Application, Integrating Frontend and Back End	Python Fast Api, Django, Node Js etc.
6.	Deep Learning Model	Purpose of Machine Learning Model	CNN, Transfer Learning etc.
7.	Infrastructure (Server / Cloud)	Application Deployment on Local System / Cloud Local Server Configuration: Cloud Server Configuration :	Local, Cloud Foundry, Kubernetes, Google cloud etc.

Table-2: Application Characteristics:

S.No	Characteristics	Description	Technology
1.	Open-Source Frameworks	List the open-source frameworks used	Python's Fast Api
2.	Security Implementations	List all the security / access controls implemented, use of firewalls etc.	e.g. SHA-256, Encryptions, IAM Controls, OWASP etc.
3.	Scalable Architecture	Justify the scalability of architecture (3 – tier, Micro-services)	Technology used

S.No	Characteristics	Description	Technology
4.	Availability	Justify the availability of application (e.g. use of load balancers, distributed servers etc.)	Technology used
5.	Performance	Design consideration for the performance of the application (number of requests per sec, use of Cache, use of CDN's) etc.	Technology used
